* Indicate on the major/minor line which major/minor advisor is changing.
* Signature not needed

Official use only: Date __________________________ Completed by: __________________________
RESOURCES FOR DECLARING A MAJOR OR MINOR
AND FINDING AN ADVISOR
For Liberal Arts Students

When choosing major or minor, students should keep in mind that any number of majors and minors can be declared, provided there is only one disciplinary (departmental) minor. For example, a student cannot minor in English and Political Science but may minor in English and Peace and Justice Studies.

Try these approaches to meet faculty members, to learn more about areas of interest to you, and to find an advisor for the major you choose to declare. Your new advisor can be a wonderful resource for information on internship and research opportunities, potential career paths, and of course, logistics for completing your degree.

- Check out the backgrounds of the faculty in the department: http://ase.tufts.edu/faculty-guide/default.asp. Keep in mind that you do not need to have an advisor with your identical interests.

- Talk about your interests with professors you already know, even those in different departments.

- Ask the department administrator for a list of available advisors. Some departments will also suggest that you meet with the chair to facilitate the best match with your interests.

- Consult with potential advisors at non-peak times (not just before registration). Office hours are listed on department web sites.

- Make sure to attend the major declaration info sessions and individual department receptions scheduled during Majors Week. A full schedule of events will be updated here: http://uss.tufts.edu/undergradEducation/advising/major.asp

For additional assistance in choosing a major and/or finding a major advisor, please speak with your current advisor; visit office hours for faculty in your departments of interest; or speak with your academic dean in Undergraduate Education:
